

Transport & logistics

Always a solution!

Always a solution

CARU Containers operates as European market leader in sales, rentals and leasing of new and used containers. Our customers can be found in different industries, like shipping, off-shore, logistics, construction, automotive, oil- and chemical industry, general industry, governments, municipalities, army, traders and rental companies.

Container solutions that support your logistical services

You want to be able to quickly have containers available for your services? Anywhere in the world? At any moment? In any size? CARU Containers has the solution for you!

Thanks to our global network of depots and an excellent maritime network, we can supply complete container solutions! We constantly invest in the improvement of our existing containers and the development of new ones, so we're able to deliver you the best service and quality.

From standard containers, to reefers, tanks and specials, like: open top, hard top, flats and many more. We are able to supply just what you need. This makes it easy for you and due to the short delivery time, you get value for money.

How our solutions can benefit you:

- New and used containers are always available, so you can be certain that you always get the quality you want
- Rental and leasing is possible for long and short term, so you can always choose the most cost-effective solution
- Modified and rebuilt containers are possible, giving you the ability to transport rare and special products
- Maintenance and repair services are offered, giving you the certainty that your product will always be in top condition
- Our optional Buy-back guarantee gives you the certainty that you will be able to sell the containers after you're finished with them
- Our Lease-purchase option gives you the freedom to pay on your terms

CARU Containers: Always a solution!

All containers in this brochure are:

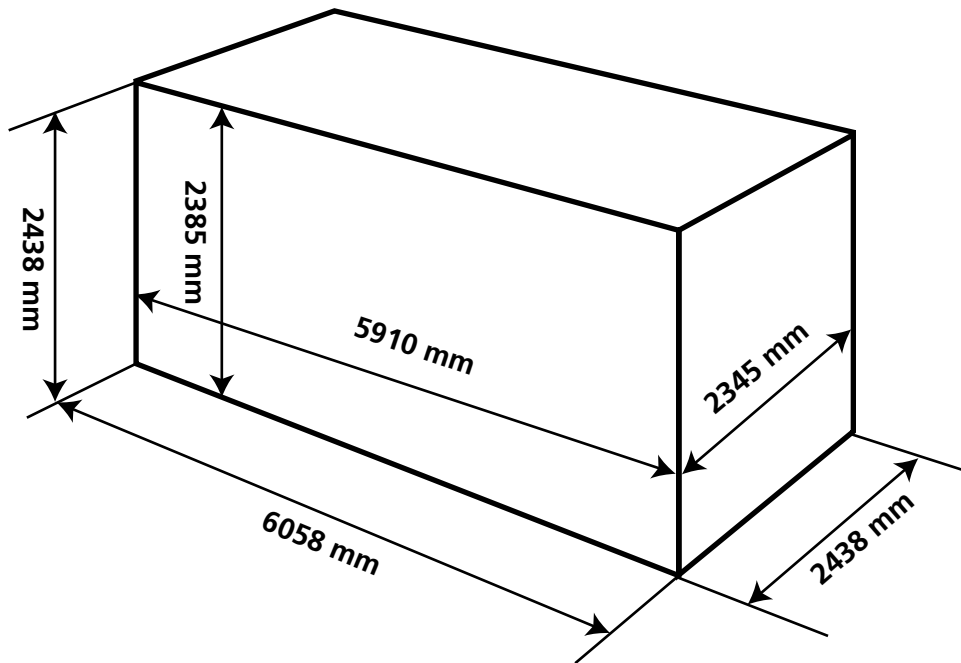

- Available for sale and rental
- Available as new and used containers
- Standard with wooden floor
- Provided with CSC certificate
- Suitable for transport and storage

Maximum payload depends on the weight of the container.
Given weights are guidelines.

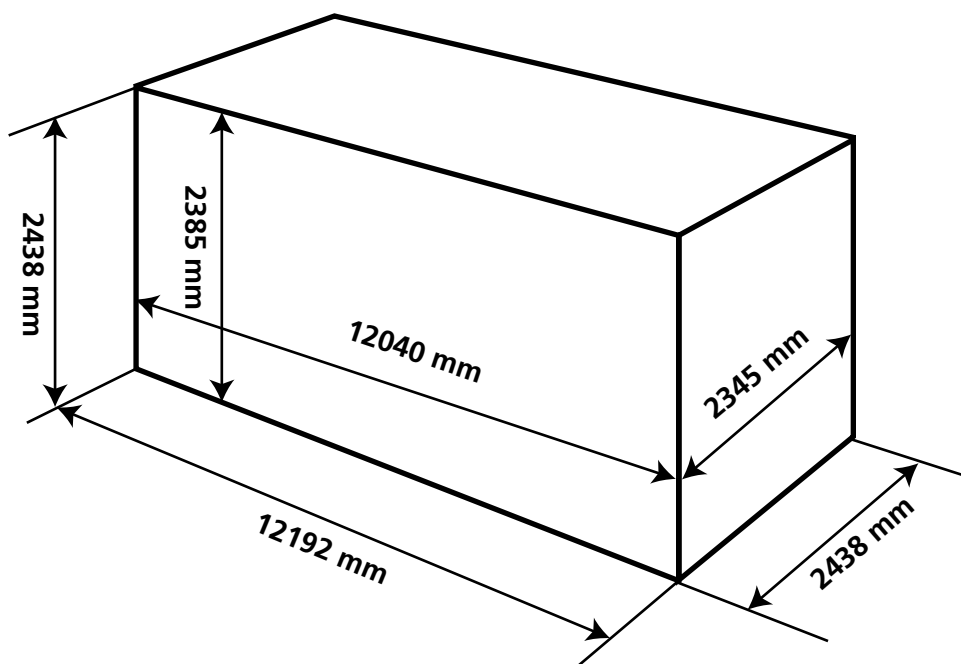

For exact weights you can contact one of our offices.

For more information, check www.carucontainers.com
